DETAILED ACTION

Claim Objections

Claim 3 is objected to because of the following informalities: --a-- should be inserted after "of" in line 3.. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 5, and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Fontenot et al (5,329,658). Fontenot et al shows a blanket elevator apparatus 10a in Figures 3 to 7 that is of particular interest. The device comprises an elevating frame 18a that is supported upon a pair of legs 19 over the foot end of a mattress to support a blanket. A blanket lock plate 26 is also provided that slips between the mattress and box spring, the lock plate 26 includes a pair of leg receiving apertures 34 at one edge that receive the legs 19 of the frame 18a.

Claims 1, 5, and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Good (2,602171). Good shows a bedding elevator device 11 for use upon the foot end of a mattress. The elevating device includes a pair of retainers 2 that are slipped between the mattress and boxspring and which include tubular sockets 1 that receive vertical legs 4 that form part of a

Art Unit: 3673

bedding elevating frame. The bedding elevating frame 11 includes horizontal legs 5 and cross arms 13, 14 that telescope into one another to adjust the width of the device. The legs 4 also include lock notches 6 that engage a spring latch 8 attached to the sockets 1 of the retainer.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 10 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Good. The material used to construct the Good bedding elevator is no described, however it is well known in the art to use rubber coated plastic or metal tubing to construct frames made from a tubing type material. Examples such as the tubing used in baby strollers, push handles used in lawnmowers, side rails used in beds, etc are well known in general and as such it would have been obvious to the skilled artisan that the tubing used to make the Good bed elevator could have been selected from such materials. The reason for doing so would be to use a padded surface fro the tubing in order to prevent any injury to a user of the bedding elevator.

Allowable Subject Matter

Claims 2 to 4 and 7 to 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's

disclosure. Cobb (2,642,589), Gibbons Sr., Hannaberg, Merriman, Moore, and Cobb (5,881,406)

show bedding elevating devices that are of general interest.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Michael Trettel whose telephone number is 703-308-0416. The

examiner can normally be reached on Monday, Tuesday, Thursday, or Friday from 7.30 am to

5.00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Heather Shackelford, can be reached on (703) 308-2978. The fax phone number for

the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding

should be directed to the receptionist whose telephone number is 703-308-1113.
